

Our Course is Now Using the B-Rake!

After careful consideration and evaluation, management has decided to introduce the new B-Rake into our bunker maintenance routine.

Designed to be pulled rather than pushed, the B-Rake boasts a unique brush attached to the rake head. When pulled, this brush effortlessly smooths out claw marks and tines left behind by conventional rakes.

Scan the QR Code to learn how to use the B-Rake to improve our bunker conditions.
